

School Tour

Thanks to the generosity of the Diocese, our parishioners, and our Baraga families, in the fall of 2005 Bishop Baraga Catholic School moved into a brand new building on West Lincoln Avenue. Construction of a new school allowed us to increase the size of our classrooms while also providing facilities to help support our academic goals, such as a new library, computer room and chapel. If you would like to visit the school or learn more about our facilities, please call the school office and set up a tour.

Classrooms

Our large, bright classrooms allow ample space not only for desks, but for other multiuse areas as well.

Computer Room

The school includes a spacious computer room with 22 work stations and one network server. The room is also equipped with scanners and electronic media designed for technology instruction. Each classroom also has 2 to 4 computers for student use. The classroom computers have age-appropriate software available, as well as video, scanning and electronic media used to supplement daily instruction.

Chapel

We are blessed to have a beautiful chapel within our new school. This gathering area is used often by the students and faculty for our weekly Masses, school assemblies, and other large activities.

Library

Our library features a computerized card catalog, allowing teachers to research relevant books from their classroom computers. Each student visits the library weekly to check out books.

Gym / Lunch Area

Centrally located within the school is a full-size gymnasium that also serves as the school's lunch area. Students use the gym to participate in regular physical education classes and as a recess area during inclement weather.

Playground & Sports Field

Directly behind the school building is our recess area. The students have access to a variety of playground equipment, as well as a soccer field and sledding hill.
